Bottle-top dispensers

The Calibrex™ models

A generation of robust instruments with excellent chemical resistance, high performance, and easy maintenance. Fitting most reagent bottles, it enables safe and reproducible dispensing in volumes ranging from 0.1 to 100 mL. Choose between the *organo*, the *solutae* and the *universal* models for adequate resistance to liquid dispensed. Two-year warranty.

- Selection between three different models
- Colour coding identification
- Integrated calibration system
- Long lasting performance stability
- Easy disassembling for maintenance
- QR code accessing chemical compatibility chart
- Optional flow control stopcock for 525/530 models
- Autoclavable at 121°C / 250°F fully assembled

See chemical compatibility page [6](#)

Superior material selection

Parts in contact with liquid flow are chemically inert, providing for stability and long instrument life.

Permanent visibility

Safety transparent thick sleeve around barrel and delivery jet window allow liquid flow monitoring.

Volume setting

Spring loaded sliding cursor softly moves up and down dual scale and precisely stops at desired graduation. Easy exchange for the alternative classical screw button, available as accessory.

Flow control stopcock

Next to its dispensing position **b**, device enables liquid priming and recycling **a** without reagent loss or contamination. Locking position **c** for safe dispenser transportation.

Optimal working position

The instrument rotates 360° for adequate positioning on the bottle. Free rotating dispenser body makes volume clearly visible from any position.

Chemical resistance

Printed QR code for instant access to chemical resistance chart.

Air filter

Air inlet can be enlarged to receive a membrane filter, if airborne contamination is a concern.

Easy In-lab calibration

Access to mechanism protected by safety seal sticker. Integrated key located under plunger cap. Engraved +/- arrows for easy and precise setting.

Maintenance

Disassembling/reassembling facilitated by limited number of well-connected parts – no tool needed. Key elements such as valves, plunger, barrel and delivery jet removable in seconds for cleaning. Fully autoclavable at 121°C / 250°F.

Bottle-top dispensers

The Calibrex™ *organo* 525

Calibrex™ *organo* 525 dispenser includes a ground glass or ceramic plunger, both suited for organics and non-crystallizing acid and base solutions. The material of the plunger is the main differentiating element compared to Calibrex™ *solutae* 530 model. The other characteristics, as well as all accessories, are common to both dispensers.

Two-year warranty.

- Permanent fluid path visibility
- Integrated calibration system
- Choice of adjustment buttons (optional)
- Flow control system with stopcock (optional)
- QR code accessing chemical compatibility chart
- Autoclavable at 121°C / 250°F fully assembled

Warning: omission to untighten connecting body ring before autoclaving, and / or over-tightening ring when dispensing may reduce performance.

Bottle-top dispensers

The Calibrex™ *solutae* 530

Calibrex™ *solutae* 530 has a glass or ceramic PFA coated plunger preventing the crystallization of chemicals. It enables trouble free distribution of salt solutions, weak and strong acids, as well as bases.

Two-year warranty.

Bottle-top dispensers

The Calibrex™ universal 520

Designed for performance handling of liquids from a large variety of bottles and flasks, the Calibrex™ universal dispensers combine the latest in dosing technology, high-tech materials and ergonomic design. They are manufactured and tested to fully comply with current safety regulations. Fixed versions also available in any volume within these ranges.

Two-year warranty.

- Superior chemical resistance
- Long-lasting performance stability
- Simple construction – no tool for disassembling
- Single hand volume setting
- Calibration mechanism under the cap
- QR code accessing chemical compatibility chart
- Autoclavable at 121°C / 250°F fully assembled

Friendly digital volume setting

Fast and precise volume adjustment. Efficient click-stop mechanism prevents unwanted alteration. Large display is easy to read; the window adjusts to desired side of instrument body. Each step on the cylindrical cam is pre-calibrated and corresponds to one division on the volume adjustment scale.

Optimised working position

The instrument rotates 360° for adequate positioning on top of the bottle.

Air filter

Air inlet can be enlarged to receive a membrane filter, if airborne contamination is a concern.

In-lab calibration

Calibrex™ dispensers are factory calibrated and can be easily recalibrated by means of a dedicated adjustment screw.

Easy maintenance

Disassembling/reassembling is facilitated by the limited number of well-connected parts - no tool needed.

Performance and ordering information

Calibrex™ universal 520 have a 32 mm base thread. They come with three adaptors: 28, 40, 45 mm and 300 mm feed tube.
